War with England. The best comment on the arrogant speculation of the British press on the effect of a war with the United States, is the following list of British ships of war and British morehant vessels captured during the short war of 1812. When that was com menced, there were few persons in England or the United States who believed that we could cope with England on the cotan. We were not only p to the let ult, are about \$10,000 in advance of without a ravy, but we were comparatively with out seamen. Now, the first gun fired from her fluating batteries would awaken the dorman energies and call into action the resources which would do more to humble the pride of England than all her former wars. Wo cannot believe that the madness of her folly can cud in war; but if it does, then let there he no more peace until her claim, that she is the mistress of the seas, shall be exploded. We give, for the information of our eaders, the list of thips of war and British mercaaut vossels captured by Americans during the
